ROHIT LODWAL

Node.js Developer | AI Integration | 3+ Years Experience

rohitlodwal9094@gmail.com | +91 88894 14581 | Ujjain, Madhya Pradesh | LinkedIn | GitHub

SUMMARY

Results-driven Node.js Developer with 3+ years architecting and shipping production-grade REST APIs, ERP, SaaS, and e-commerce backends end-to-end. Deep expertise in Node.js/Express API design, MongoDB/MySQL schema design, JWT authentication, and RBAC, with hands-on experience building AI-powered chatbots using Embeddings and Retrieval-Augmented Generation (RAG), and leveraging AI coding tools (Claude, Cursor) to ship faster without compromising quality. Also comfortable building complete full-stack applications with React.js when a project calls for it, and owning a project from architecture through deployment (Docker, CI/CD, Linux/VPS).

- **6+ full-stack platforms** delivered end-to-end for enterprise and startup clients.
- **35% faster API response times** achieved through MongoDB/MySQL query optimization and indexing.
- **60% reduction in manual operations** via workflow automation across ERP systems.

TECHNICAL SKILLS

- **Backend:** Node.js, Express.js (primary); PHP, Laravel, CodeIgniter (secondary)
- **Databases:** MongoDB (Mongoose, Aggregation, Schema Design), MySQL
- **API & Security:** REST API Design, JWT Authentication, Role-Based Access Control (RBAC), Payment Gateway Integration (Razorpay)
- **AI/ML & Tooling:** AI Chatbot Development, Embeddings, Retrieval-Augmented Generation (RAG), LLM Integration, AI-Assisted Development with Claude & Cursor
- **DevOps & Tools:** Docker, CI/CD Pipelines, Linux/VPS, Hostinger, Git/GitHub, Postman
- **Frontend (Full-Stack Delivery):** React.js, TypeScript, Hooks, Component Architecture, Responsive UI

EXPERIENCE

Software Engineer, Manal Softech Private Limited *Apr 2022 – Mar 2025 | Ujjain*

- Engineered full-stack ERP and enterprise applications using a Node.js/Express backend (with React.js on the frontend where needed), alongside PHP (Laravel) for select modules.
- Architected and maintained scalable RESTful APIs (Node.js/Express) powering multi-module ERP systems used across the organization.
- Boosted API performance by up to 35% through MongoDB/MySQL query optimization and indexing.
- Secured applications end-to-end by implementing JWT authentication and role-based access control (RBAC).
- Designed backend architecture and business logic for complex ERP modules; partnered with frontend teams and clients on requirement analysis.
- Owned deployment and server configuration on Linux-based environments, ensuring stable production releases.

Freelance Node.js Developer, Independent Contractor *Apr 2025 – Present | Ujjain / Remote*

- Deliver Node.js/Express backends and REST APIs (with React.js frontends where required) for ERP, e-commerce, and enterprise clients — owning the complete lifecycle from development through production support.
- Drive the complete project lifecycle: development, testing, deployment, and post-launch support, for multiple concurrent clients.
- Integrated Razorpay and other third-party APIs; deployed and maintained applications on VPS (Linux) and Hostinger, handling server setup and maintenance.
- Leverage AI-assisted development tools (Claude, Cursor) to speed up coding, debugging, and code review — shortening delivery timelines across client projects.

KEY PROJECTS

AI Chatbot API — Embeddings & RAG-based Assistant *(Node.js, Express.js, Vector Embeddings, RAG, LLM API Integration)*

- Built a Node.js/Express backend service powering an AI chatbot that uses Embeddings and Retrieval-Augmented Generation (RAG) to answer queries grounded in custom knowledge bases/documents.

- Designed the end-to-end pipeline: document ingestion, chunking, embedding generation, vector search, and context-aware response generation via LLM API calls.
- Built REST APIs to expose chatbot functionality for integration into client applications; used Claude and Cursor throughout development to accelerate iteration, debugging, and code quality.

IndiaPhosphate ERP *(Node.js, Express.js, React.js, MySQL, Docker, CI/CD)* — *erp.indiaphosphate.com*

- Led development of Inventory, Sales, Accounts, and HR modules, and designed master configuration modules for centralized system control.
- Built scalable REST APIs and backend architecture; reduced query response time by 35% through optimization.
- Containerized the application with Docker and set up CI/CD pipelines for automated build, test, and deployment.

ShivSetu — Multi-Service Booking & E-commerce Platform *(Node.js, Express.js, React.js, MySQL)* — *shivsetu.com*

- Built a full-stack multi-service platform for Puja Booking, E-commerce, and Travel Packages, with a scheduling and service-customization booking system.
- Designed cart, orders, and checkout flow; integrated Razorpay for secure payments and improved API throughput by 30%.

Alaska AAC Blocks ERP *(Node.js, Express.js, React.js, MySQL, MongoDB)*

- Developed end-to-end ERP for production and dispatch management with real-time stock tracking and notifications.
- Reduced manual work by 60% and improved process transparency through automation.

Positiivplus — Supplier Assessment Platform *(Node.js, Express.js, React.js, MongoDB)* — *app.positiivplus.com*

- Built a supplier assessment platform with dynamic dashboards and automated report generation.
- Implemented a custom role-based access control (RBAC) system and scalable APIs for high-volume data handling.

Hotel PMS Software *(Node.js, Express.js, React.js, MongoDB)*

- Developed a hotel management system for reservations, billing, and guest management across multiple branches.
- Created an admin dashboard for occupancy, revenue, and service analytics.

Awantika Rudraksha — E-commerce Platform *(Laravel, MySQL)* — *awantikarudraksha.in*

- Developed an e-commerce platform for spiritual products with product, cart, and order management, plus a secure checkout and payment flow.
- Built an admin panel for inventory management and promotional offers.

EDUCATION

B.Sc. Computer Science — Institute of Computer Science, Vikram University
